ELECTROHUB
ELECTRONICS STORE WEBSITE

WEB DEVELOPMENT PROJECT REPORT

Project Name	ElectroHub – Electronics Store
Technologies	HTML5 and CSS3
Project Type	Static front-end website
Website Sections	Categories, products, comparison, details, offers and contact

Your destination for the latest technology.

Prepared from the HTML source code and website screenshot supplied.

1. Introduction

ElectroHub is a sample electronics store website designed to present electronic products in an organised and attractive layout. The website includes a navigation bar, promotional banner, product categories, featured products, a laptop comparison table, product information cards, a special sale section, and contact details. The design uses a dark navy header and footer with bright cyan highlights. HTML5 provides the page structure, while an external CSS file is intended to control the appearance.

2. Objectives

• Create a clean homepage for an electronics shopping website.

• Organise products into Laptops, Smartphones, Accessories, and Smart Devices.

• Display product images, specifications, discounts, and prices.

• Provide a comparison table for two laptop models.

• Add product detail sections and a special electronics sale banner.

• Practise HTML page structure, links, images, tables, and semantic elements.

3. Technologies Used

HTML5: Used to create the website structure with elements such as header, nav, section, div, article, table, image, link, and footer.

CSS3: The HTML links to an external stylesheet named **electronics.css**. This stylesheet is expected to define colours, spacing, product layouts, buttons, cards, and responsive design.

JavaScript: No JavaScript code is included in the supplied source. The page is a static front-end demonstration.

4. Main Website Sections

Header and Navigation

Displays the ElectroHub brand and links to Home, Categories, Products, Compare, and Contact.

Hero Banner

Shows the heading “Upgrade Your Digital Life”, a short promotional message, and a Shop Now link.

Shop by Category

Provides four category links: Laptops, Smartphones, Accessories, and Smart Devices.

Featured Products

Displays eight products across four categories, with two products in each category.

Laptop Comparison

Compares UltraBook Pro 14 and GamingBook X using processor, RAM, storage, graphics, and price.

Product Details

Provides short descriptions for the laptop, smartphone, wireless accessories, and smart devices.

Special Sale Offer

Highlights a special electronics sale and provides an Explore Offers link.

Footer and Contact

Displays the ElectroHub name, tagline, sample email address, phone number, and copyright text.

5. Product Information

Category	Product	Key details	Displayed price
Laptops	UltraBook Pro 14	Core i5, 16GB RAM, 512GB SSD	■59,999
Laptops	GamingBook X	Core i7, 16GB RAM, 1TB SSD	■84,999
Smartphones	SmartPhone Nova	8GB RAM, 128GB, AMOLED, 5G	■24,999
Smartphones	SmartPhone Max	12GB RAM, 256GB, OLED, 5G	■39,999
Accessories	Wireless Headphones	Bluetooth, noise reduction, 30-hour battery	■2,999
Accessories	Wireless Mouse	Adjustable DPI, ergonomic design	■849
Smart Devices	SmartWatch Fit	Fitness tracking, heart-rate monitor	■3,999
Smart Devices	Smart Home Hub	Wi-Fi connectivity, voice control	■4,499

6. Laptop Comparison

Specification	UltraBook Pro 14	GamingBook X
Processor	Intel Core i5	Intel Core i7
RAM	16GB	16GB
Storage	512GB SSD	1TB SSD
Graphics	Integrated	Dedicated
Price	■59,999	■84,999

7. Important HTML Concepts

Semantic Elements

header, nav, section, article, and footer describe the purpose of different page areas.

ID Attributes

IDs such as home, categories, products, compare, and contact identify sections on the page.

Anchor Links

Links such as href="#products" take the visitor to the matching section on the same page.

Images and Alt Text

The img element displays product images, while alt text describes each image if it cannot load.

HTML Tables

The table, tr, th, and td elements organise laptop specifications into rows and columns.

External Stylesheet

The link element connects the HTML document to electronics.css for visual styling.

8. Website Output Screenshot

The screenshot supplied with the project shows the ElectroHub page with the dark navigation bar, cyan-and-blue hero area, four product categories, eight product cards, laptop comparison table, product details, sale banner, and footer.

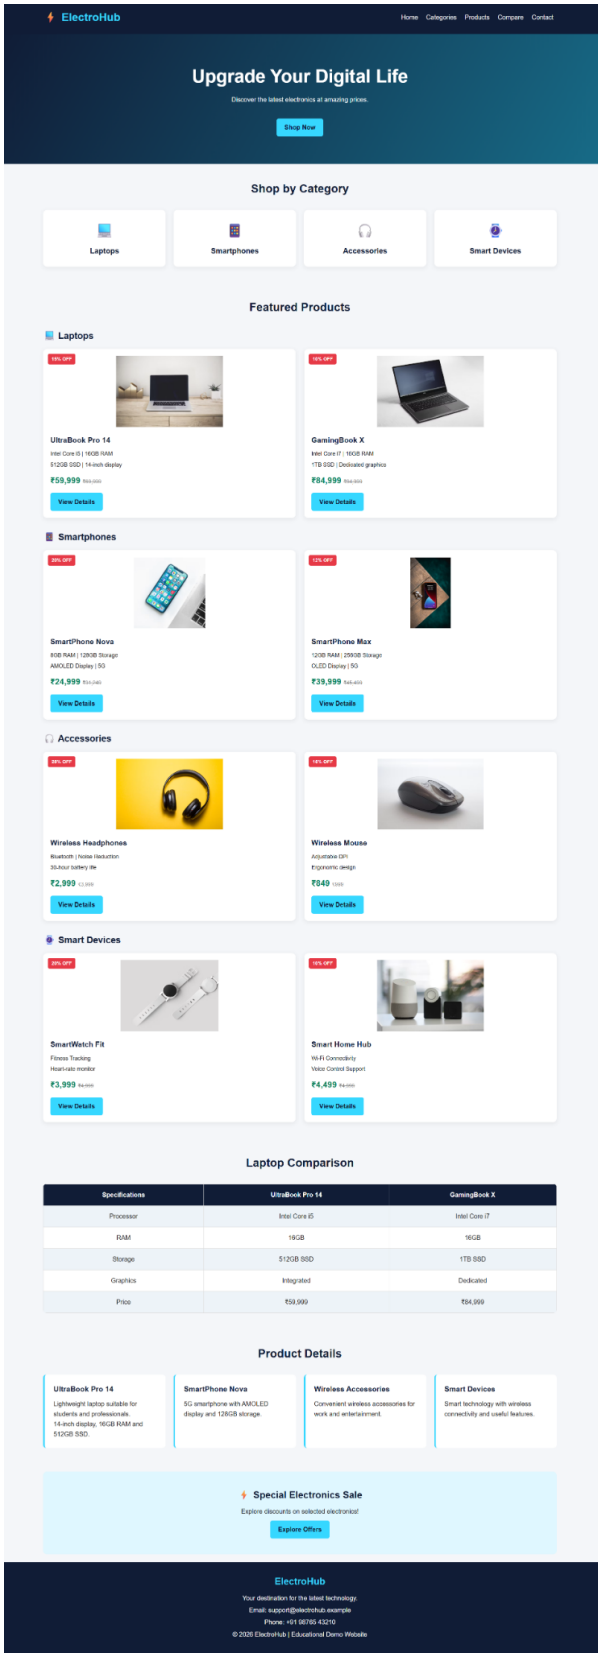

Figure 1. ElectroHub website output (user-supplied screenshot).

9. How the Website Works

• The browser opens the HTML file and reads its page structure.

• The browser loads the external stylesheet named electronics.css.

• The stylesheet applies the visual design to the header, hero banner, category cards, product cards, table, offer section, and footer.

• Navigation links use section IDs to move visitors to different parts of the same webpage.

• Product images are loaded from the external image URLs included in the img elements.

• The View Details, Shop Now, and Explore Offers links navigate to sections within the page.

10. Observations and Suggested Improvements

• The supplied HTML refers to electronics.css, but the CSS source file was not provided. This report includes the complete HTML supplied by the user.

• Product names, prices, specifications, discounts, and contact information are sample educational content.

• The supplied page does not include a shopping cart, search function, login system, checkout, or payment processing.

• The product image URLs require an internet connection to display the images.

• A future version could add product search, category filtering, a working cart, quantity selection, checkout, and database support.

• The comparison table currently compares only the two laptop products.

11. Conclusion

ElectroHub demonstrates how HTML can be used to organise an electronics store website into clear sections. It presents product categories, product specifications, discounts, a laptop comparison table, product details, and contact information. The project is useful for practising HTML structure, semantic elements, anchor links, images, and tables. CSS styling is connected through the external electronics.css file, which is required to reproduce the complete visual appearance shown in the screenshot.

12. Viva Questions

What is the purpose of the ElectroHub project?

To present electronic products and their details in an online store layout.

Which categories are included?

Laptops, Smartphones, Accessories, and Smart Devices.

What is the purpose of the nav element?

It groups the main navigation links of the website.

What does href="#compare" do?

It navigates to the section whose ID is compare.

Why is alt used in an image element?

It provides alternative text describing the image.

What is the purpose of the comparison table?

It compares the specifications and prices of two laptop models.

Which external CSS file is linked?

electronics.css.

Does the supplied HTML implement a working cart?

No. The supplied HTML does not include cart functionality.

Appendix A. Complete HTML Source Code

The following is the complete HTML source provided. It links to an external stylesheet named electronics.css; that CSS file was not included in the supplied material.
